

Welcome to Guardian

Setup takes about 10 minutes. Scan the code below and Guardian Companion guides you through every step.

START WITH GUARDIAN COMPANION

Scan to begin — about 10 minutes.

Guided installation, setup, and personalization,
step by step, right from your phone.

You're Minutes Away

Thank you for choosing HomeCleanse Guardian. In just a few minutes you'll be monitoring your home with one of the most advanced air quality systems available — just scan the QR code and Guardian Companion guides you through every step.

Setup typically takes about 10 minutes

Have your phone nearby — that's all you need to get from box to baseline.

What's in the Box

Take a moment to make sure you have everything included in your Guardian package.

Your box should contain

- ✓ HomeCleanse Guardian
- ✓ Two Sensor Capsules
- ✓ Two Wall Mount Plates (Thin & Thick)
- ✓ USB-C Power Adapter
- ✓ Ethernet Cable
- ✓ Mounting Hardware
- ✓ Allen Wrench
- ✓ Certificate of Calibration

Something missing?

If anything is missing, please contact HomeCleanse Support before installation.

Five Steps to Get Started

A clean, five-step journey from opening the box to opening Guardian Companion.

1**Install the Sensor Capsules**

Insert each capsule into its slot and press gently until you hear an audible click, confirming it's fully seated.

2**Choose the Right Location**

Place Guardian where your household spends the most time, away from windows, doors, and heating or cooling equipment.

3**Mount or Position Guardian**

Install the wall plate with the included hardware and slide Guardian into place — or rest it on a stable, level surface for now.

4**Connect Power**

Plug Guardian in with the included USB-C adapter. A flashing logo or a brief restart during startup is completely normal.

5**Complete Setup in Guardian Companion**

Scan the QR code and Companion walks you through Wi-Fi, registration, and your dashboard.

A note on startup

During startup you may see the logo flash, the display briefly turn off, or the screen restart. Don't disconnect power while Guardian is starting.

Finding the Right Spot

Guardian performs best when it monitors the air in the areas where your household spends the most time — like a living room, family room, or home office.

Avoid installing Guardian near

- ✗ Windows
- ✗ Exterior doors
- ✗ Heating equipment
- ✗ Air conditioning equipment
- ✗ HVAC vents

Keep the air moving

Keep the bottom air intake and the top air outlet clear for accurate monitoring. Guardian Companion includes a complete Placement Guide.

Complete Setup in Guardian Companion

Guardian Companion takes you the rest of the way — from box to baseline. Everything you need is just a scan away.

Companion will guide you through

- ✓ Connecting to Wi-Fi
- ✓ Registering your Guardian
- ✓ Personalizing your dashboard
- ✓ Understanding your air quality readings
- ✓ Exploring the Resource Center

Scan to continue with Guardian Companion

From box to baseline — guided every step of the way.

NEED HELP?

We're Here to Help

If you have questions during setup, our team is happy to help — and Guardian Companion has guides, video tutorials, and support built right in.
